

## Reference

# Case Study: Handling

Together with the OTC handling robots, Rolan offers the perfect system solution to take over the heavy and repetitive tasks in the bakery at a good price-performance ratio.

### Customer Requirement

### Rolan Robotics Solution

Efficient new working process

- Lift sheets with products
- Return empty sheets, clean, lubricate, and place them in the cart

**OTC Handling Roboter (FD 19-V50)**

Adaptable to future business developments

**New processes can be easily reprogrammed.**

Reduction of labor costs

**Saving a full-time position**

#### OTC Handling Technology

- OTC handling robots can optimise your production processes. They complete your tasks at top speed and are equally suitable for milling and sanding work as well as packaging, gluing and spraying tasks.
